

Before you enjoy your
**Amcor Plasma Series
Portable Air Conditioner**,
it's important to read
these easy set-up instructions.

For more information, please see the enclosed
Owner's Manual, call **866-361-2233**, or
visit **www.amcorgroupusa.com**

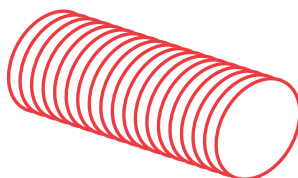

IMPORTANT:

Leave the
Air Conditioner
in an upright position
for at least two hours
before turning on!

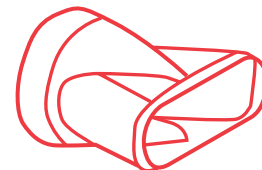

1. Locate Parts

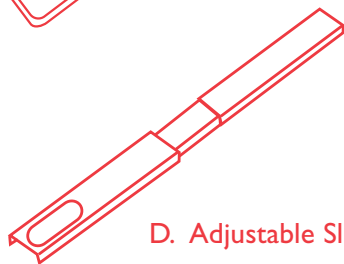

A. Remote Control

B. Exhaust Hose

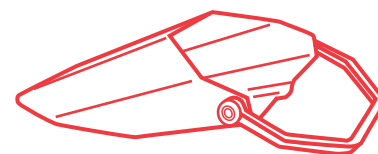

C. Slide Bar Connector

D. Adjustable Slide Bar

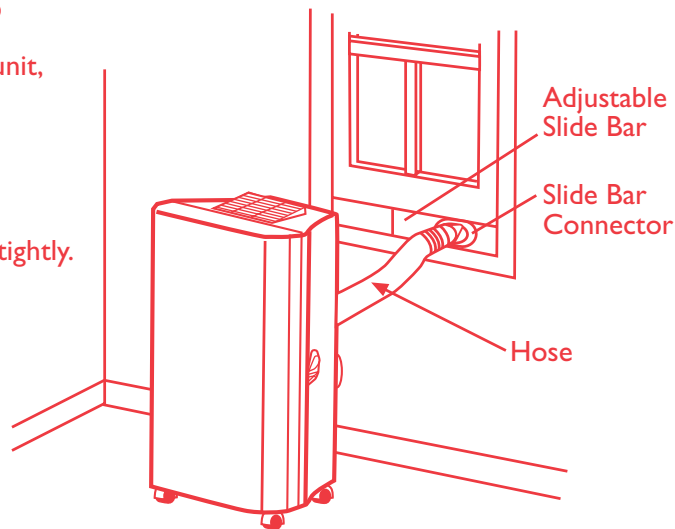

E. Insulation Strip

F. Drain Pan

2. Installation of the Window Kit

1. Extend Exhaust Hose (B) at least 6" and insert it into back of the unit, tightening into place by turning it clockwise.
2. Attach Slide Bar Connector (C) to the other end of the Hose by extending Hose at least 6". Then tighten Hose by turning the Slide Bar Connector clockwise.
3. Place Adjustable Slide Bar (D) in the window and expand so it fits tightly.
4. Mark Slide Bar to record width of the window.
5. Apply Insulation Strip (E) on top and bottom of Slide Bar.
6. Reposition Slide Bar Connector in the window. Expand the Slide Bar to fit tight. Tighten the screws.
7. Lower the window.
8. Make sure Hose has no kinks.

3. Turning the Unit On

1. Plug the unit into a working electrical outlet.
2. Make sure the green light on the plug is on. (If not, press the Reset Button.)
3. Press the unit's ON/OFF Button on the LCD display. It may take a few minutes before cold air is dispersed.
4. Adjust FAN Speed by pressing the FAN Button until the preferred fan speed is reached.
5. Press the Timer Button to Set.
