AMCOR INTRODUCES NEW PLM PORTABLE AIR CONDITIONER

Next Generation of Portable Air Treatment Systems Offers Enhanced Performance, Efficiency and Design for Home, Apartment and Office

CHICAGO, IL., (Home & Housewares Show) - March 12, 2006 — Amcor, a global manufacturer and marketer of world-class air treatment and purification systems for the home and office, today introduced its PLM Portable Air Conditioner. Representing the latest in Amcor's line of next generation portable air conditioners, the Amcor® PLM offers consumers an attractive and convenient portable air cooling solution.

The Amcor® PLM provides consumers with increased performance, energy efficiency and convenience and is an ideal addition to any central air conditioning system. Used as an alternative to "total home" cooling, the Amcor System provides comfort where needed and reduces overall energy costs.

In addition, the Amcor® PLM Portable Air Conditioner features a contemporary design scheme including a stylish, easy-to-read, backlit LCD control panel. The featured "plasma look" of the PLM reflects the simplicity and elegance of flat screen televisions and state-of-the-art home audio systems. The inclusion of this added design component reflects a growing industry trend towards seamlessly integrating power and style.

Amcor offers a full line of PLM Portable Air Conditioner units, from 10,000 BTU/hr to 16,000 BTU/hr to meet a wide range of air treatment applications. For ease-of-use, the Amcor® PLM portable air conditioner also includes an easy-to-read backlit LCD display on both the unit itself as well as its remote control. In addition, a 24-hour programmable timer helps reduce energy costs.

Other key features of the Amcor® PLM Portable Air Conditioner Include:

- Unique patented Evaporative Booster for more efficient cooling;
- Three speeds (two fans plus one turbo);
- Thermostat Range: 64F ~ 90F;
- 3M Filtrete filter: removes dust, pollen, bacteria and animal dander;
- Activated carbon filter helps remove odor;
- Washable air filter collects large dust particles and prevent bacteria build-up;

Key features continued:

- Full thermostat control;
- Backlit LCD control panel;
- Programmable timer (24 hours);
- Adjustable louvers to control air flow;
- Remote control with LCD display;
- Moisture Removal: 80 pints per day;
- Extendable exhaust hose (up to five feet);
- Power Supply: 120V / 60Hz / 1 Phase;
- Built-in castors for easy moving;
- Dimension: 20"W x 16"D x 33"H;
- Weight: 75lbs.;
- Warranty: limited one year and five years on the compressor.

"The Amcor PLM Portable Air Conditioner represents a significant and very innovative trend in portable air treatment systems available to consumers today," said Robert Kramer, president of Amcor. "This not only has to do with power and performance but also with regard to design, versatility, cost efficiency and convenience. This is especially evident when compared to the more traditional in-window air conditioners and full central air conditioning systems which can be costly and cumbersome."

Mr. Kramer continued: "Based on our industry experience and knowledge, we designed the Amcor PLM Portable Air Conditioner to incorporate all of these components and the response we've received from our retail partners as well as consumer end users has been overwhelmingly positive."

Pricing and Availability

The suggested retail price range for the Amcor® PLM varies based on the size of the unit.

About Amcor

For over 50 years, Amcor has specialized in complete indoor, environmental control; through its manufacturing and marketing of a world- class range of innovative products, which are naturally sought by a new more demanding consumer. Whether for home or at work, Amcor has the best solutions for your living environment. Through listening to the desires and aspirations of its global customers, Amcor provides an on-going stream of unique, innovative and practical product solutions.
